

Granular Active Carbon Filter Cartridges

Xsential Activated Carbon Filter Cartridges remove chlorine, organics, color, tannin, objectionable tastes and odors from water. Our GAC filter cartridges can be used with most standard filter housings and as replacements in existing systems or assemblies.

Xsential carbon filters can be used as pre-treatment or post treatment to residential and commercial RO systems, or as a stand-alone point of use (POU) water treatment solution for clean, fresh tasting drinking water.

Xsential GAC filters reduce;

- Chlorine
- Bad Tastes & Odours
- Turbidity (Cloudy Water)
- Herbicides, Pesticides, & Insecticides
- Volatile Organic Chemicals (VOCs): Organic Chemicals that turn into vapour

Part No.	O.D x Length	For Housing Size	Cartridge Style
M85C	10" x 2.5"	10" standard or slimline	Drop-in
M8520C	20" x 2.5"	20" standard or slimline	Drop-in
MUBGAC10	10" x 4.5"	10" Jumbo or big blue	Drop-in
MUBGAC20	20" x 4.5"	20" Jumbo or big blue	Drop-in

Unique sub-PP replacement sediment cartridge design for MUBGAC series cartridge. This new design will give you a higher throughput and longer life span. Traditional granular active carbon cartridges only have small water entry holes on the bottom of the cartridge which can lead to early blockage.

MUGGAC10

The construction of the cartridge allows water to enter at one end and pass through the entire length of the carbon bed before exiting the other end of the cartridge. This design allows for maximum contact between the water and carbon, ensuring maximum absorption.

Note: The filter cartridge lifespan may vary. This is mainly due to the quality of the water of which the filter is being filtered. Xsential will not be responsible for any early water filter blockage.
