With Lead Free XS304-S stainless steel faucet

**THE PERFECT SOURCE OF WATER FOR DRINKING,
MAKING BABY FORMULA, COFFEE, TEA AND MORE...**

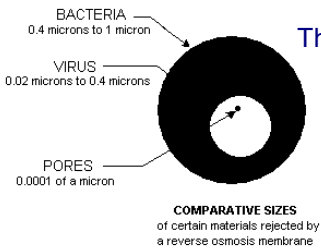

YOUR PERFECT SOURCE OF WATER FROM THE TAP

PRO-Q5H under-counter reverse osmosis (RO) water filtration system is a highly effective system that is designed to install inside your kitchen cabinet.

Unlike other water filters which only remove particles, chlorine, taste and odour, the PRO-Q5H reverse osmosis system can remove up to 96% of the impurities in the water. This include copper, lead, scale, fluoride, etc. It is easy and convenient to use and provides safe delicious water right in your kitchen.

With Australian **Watermark** certification, PRO-Q5 RO System gives you peace of mind by letting you control the quality of the water for your baby formula, drinking water, cup of coffee, etc. Our RO membrane technologically advanced filtration capability limits molecules that pass through the pores of the RO membrane and any dissolved mineral molecules (including bacteria and viruses) which are too large to penetrate the pores are flushed down the drain.

This method is used by the Children's Hospital for making formula for babies in their care.

PURIFICATION PROCESSES/ FILTER SPECIFICATIONS:

Removes Arsenic, Barium, Cadmium, Copper, Chromium (hexavalent), Chromium (trivalent), Copper, Cysts, Turbidity, Fluoride, Lead, Radium 226/228, Selenium, and more (up to 96% of the impurities).

NO OTHER WATER PURIFICATION SYSTEM COMPARES

DISTINCTIVE - Design which is built to last.

EFFICIENT - Ready for drinking, cooking, making formula, coffee and tea as needed.

COMPACT - High capacity and compact to fit any kitchen/tea room.

HEALTHY - Drink the best water.

HYGIENIC - Easy to change filter cartridge, no fuss, no mess.

SCALE PREVENTION - Stop scale/ calcium and protect your expensive appliances.
