

QAF-16

Great tasting Ice Maker Water Filter

WaterMark
AS 3497
Lic 52017

QAF16 water filter system is approved to Australian Watermark standard. It uses NSF certified activated carbon to reduce chlorine, taste and odour and other offensive contaminants in the water. It consistently provides clear, fresh, premium quality ingredient water for making ice or drinking water.

1. Filtered water direct to the ice maker
2. Easy to install
3. Faster flow (4 x faster)
4. Safe and easy to replace the filter cartridge

It is designed for medium size ice makers.

Reduces

- Sediment/ Particles/ Rusts
- Chlorine
- Unpleasant taste and odour
- Organic contaminants

Working pressure: 150-870kPa

Max. Temperature: 40 °C

Flow rate: ~6 lpm

Nominal micron rating: 5

Nominal capacity: ~40000 litres

Caution: Do not use with water that is microbiologically unsafe or with water of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.

Warning !

This filter must be flushed by running approx. 10 litres of water to waste before use.

For correct operation of this appliance, it is essential that these installation and operating instructions be strictly observed.
